CU Medical Systems, Inc.

Date of Issue: 28.01.2021

Issued By:

#### Dear Valued Customer,

CU Medical Systems has identified an issue with the battery meter on a specific batch of the iPAD SP1 AED (Automated External Defibrillator) that may cause the battery meter to display lower energy level than is actually contained in the battery. This customer information letter is intended to inform you about:

- What the problem is
- · Which devices are affected
- The actions planned by CU Medical to correct the problem

We have reviewed our records and identified that you have been provided devices which may be affected by the attached Field Safety Notice. We kindly ask that you read this notice carefully and then visit the website address below by February 28th 2021 to acknowledge that you have read and understood the contents of this notice.

We will use the information provided to contact you and arrange correction of the affected devices via a software re-install.

Further information concerning this issue will be published on the same website as it becomes available.

CU Medical Systems Inc. apologises for any inconvenience caused by this problem.

Yours Sincerely,

CU Medical Systems, Inc.

CU Medical Systems Inc. Harbrork Ra

H.R.Ra / PRESIDENT

28.01.2021

Affected Products	iPAD SP1 Semi-Automatic AED & iPAD SP1 Fully Automatic AED Serial numbers listed in the Appendix.
Problem Description	An error was made during manufacturing on a limited number of devices. The effect of this is that when a new battery is inserted in the device, the battery meter reads that the battery is full, however within a short period of time – from a couple of weeks to a few months - the battery level meter drops suggesting that the battery has less power in it. Tests have concluded that there is no issue with the batteries themselves, but instead the issue is with the way that the battery meter reports the energy level.  This issue does not cause any risk that the device will not work since there is actually more power in the battery than reported, and therefore the device will operate as expected.
	The affected devices were manufactured between 01/01/2020 and 31/05/2020 and were sold in the UK & Ireland between approximately 01/03/2020 and 31/12/2020
	The serial number of your device can be found on the label on the bottom of the device. This serial number should be checked against the list below.
How to identify affected products	SN: ######
Advice on actions by customer/user	No actions by the user are required on the device. The device will continue to operate as expected. The battery meter may show that it has less energy remaining in the battery than the actual energy in the battery. If you have one of the affected devices and the battery meter shows that there is little or no energy remaining in the battery, the battery should still be replaced as per the normal operating instructions.  Please visit the website (www.ipad-aed.com/safetynotice) to register your details so that we may arrange the software re-install.
Actions planned by the manufacturer	The cause of the software error has been identified and a fix will be made available via a software re-install. This software re-install will be done by a trained engineer at no cost to the customer.
Further information and support	Please visit the website address below for the latest information or if you have any questions or queries.
